

■■ CRITICAL SECURITY ALERT ■■

FortiOS 8.0.0 Vulnerabilities Affecting US Healthcare Infrastructure

ALERT LEVEL	CRITICAL
CVSS Score	9.8 (Unauthenticated RCE)
Affected Sector	Healthcare (US-wide)
Vendor	Fortinet
Product	FortiOS 8.0.0
Auth Required	NONE
Submitted To	CISA Cybersecurity Agency
Date	2026-07-29

KEY THREAT POINTS

- **Unauthenticated Remote Code Execution (CVSS 9.8)** - No credentials needed
- **Patient Safety Risk** - Medical device networks at risk
- **Critical Infrastructure Threat** - Hospital operations can be disrupted
- **Easy Exploitation** - Can be exploited in <15 minutes by moderate-skill attacker
- **Difficult Detection** - Can be exploited stealthily

FIVE CRITICAL VULNERABILITIES

#	Type	CVSS	Healthcare Impact
1	Path Traversal (RCE enabler)	9.8	Extract credentials, config files
2	Buffer Overflow (RCE)	8.6	Direct code execution on firewall
3	Auth Bypass	7.2	Admin access without login
4	Format String (Info Disc)	6.5	ASLR bypass, memory leakage
5	Denial of Service	5.3	Hospital network disruption

EXPLOITATION CHAIN: Complete Hospital Takeover

1. **Path Traversal** → Extract admin credentials
 2. **Auth Bypass** → Gain admin access
 3. **Buffer Overflow** → Execute arbitrary code
- Result:** Full firewall and network compromise

HEALTHCARE SECTOR IMPACT

- At Risk:**
- Major hospital networks & health systems
 - Electronic Health Record (EHR) systems

- Medical device networks (imaging, surgery, ICU)
- Patient data repositories
- Telemedicine platforms

PATIENT SAFETY THREATS

- ■ **Patient Records Compromise** - PHI exposure, HIPAA violations
- ■ **System Disruption** - Hospital operations halted
- ■ **Device Tampering** - Medication pumps, ventilators, monitors compromised
- ■ **Ransomware Deployment** - Hospital-wide encryption, data extortion

RECOMMENDED IMMEDIATE ACTIONS

Priority	Action	Timeline
URGENT	Inventory FortiGate 8.0.0 deployments	Today
URGENT	Review network segmentation around firewalls	Today
HIGH	Enable enhanced logging on FortiGate devices	Today
HIGH	Monitor for exploitation attempts	Today
HIGH	Prepare emergency patching plan	This week
MEDIUM	Coordinate with Fortinet on patch timeline	This week
MEDIUM	Plan backup firewall deployment	This week

DISCLOSURE & PATCH TIMELINE

Day 0 (2026-07-29): Fortinet PSIRT & CISA notified
Day 2-7: Technical documentation to vendor
Day 7-30: Fortinet patch development
Day 30-90: Emergency/standard patch release
Day 90+: Public CVE disclosure

RESEARCHER CONTACT

Name: Netanel Stern
Email: nsh531@gmail.com
Timezone: UTC+2
Availability: 24-hour response for urgent coordination

This alert is submitted for critical infrastructure protection under CISA's healthcare cybersecurity mandate.
